## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the ferroelectric film having a plurality of crystal faces must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.
2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: Figure 5 is not described.

Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

3. The disclosure is objected to because of the following informalities: The description of elements 1-15 is not found in the specification.

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1-25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

- It is not clear what Applicants mean by “an epitaxial ferroelectric thin film that has a plurality of crystal faces”
- It is not clear what Applicants mean by the relation  $z/z_0 > 1.003$  wherein a crystal face parallel to a crystal face of a surface of said substrate, among the crystal faces of said epitaxial ferroelectric thin film, is taken as a Z crystal face...
- It is not clear what Applicants mean by ...a face spacing of the Z crystal face is taken as z and a face spacing of the Z crystal face of a material constituting said epitaxial ferroelectric thin film...
- What are z,  $z_0$ , x and  $x_0$ ? Are they dimensionless? What physical meaning do they have?

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2834

- It is not clear what are the metes and bounds from the claim language and what subject matter the claims encompass, as explained above.

***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The claims and the disclosure are so indefinite that their relationship to the prior art cannot be made at this time. When they are made definite such a consideration may be made. However, references with relevance to the background of the invention have been cited. See PTO-892.
